

squareVIEW DSA

squareVIEW DSA is our powerful Digital Signage solution built for the Android platform.

Using our robust High Definition media player hardware, with finely tuned Android OS, squareVIEW DSA allows you to quickly create, manage content, playlists and schedules from anywhere in the world.

DSA Cloud Management

Built & hosted on secure Amazon Web Servers, DSA provides you with the tools to quickly & easily manage your display network throughout the whole of your estate. Multiple users can manage different aspects of the displays based on the permissions given to them.

Full HD Media

The DSA media player can play any full HD .MP4 or .JPG content with absolutely no interruption.

squareVIEW Media Player

Powerful Scheduling

squareVIEW DSA offers multiple tools to allow you customise your playlist with the highest level of detail.

3G/4G and WiFi modules

Use the 3G/4G option for connectivity when WiFi or Ethernet is not available. Ideal for remote or outdoor locations.

24/7 Usage

Built with commercial grade components the DSA media player is designed to run 24/7.

Multizone & Widgets

Multizone

Multizone allows you to split your signage into multiple individual modules.

This can be used to showcase multiple adverts at the same time or with the new widget system, allows you to simultaneously show up to date, live information from social media without interrupting your digital signage.

Widgets

Widgets give you the power to include live information from a range of sources to your screens.

Deliver social media, news, weather and more alongside your company information. Widgets mean the content on screen will be periodically refreshed so your audience will be constantly engaged.
